AMENDMENT AND REQUEST FOR RECONSIDERATION

UNDER 37 C.F.R. §1.111

In response to the Official Action dated September 25, 2002 please amend the above-identified application as follows:

In the claims:

1. (Amended) A recombinant cell line for assessing therapeutic agents that regulate apoptosis, comprising:
 - a) a first plasmid expressing a p300/CBP responsive promoter operably linked to a first reporter gene;
 - b) a second plasmid expressing a non p300/CBP responsive promoter operably linked to a second reporter gene; and
 - c) a third plasmid expressing a selectable marker gene.
2. (Amended) The cell line of claim 1, said cell line being stably transfected with an additional plasmid encoding wild-type p300/CBP to augment endogenously expressed p300/CBP protein levels.
3. (Amended) A screening method for determining if a therapeutic reagent inhibits p300/CBP activity thereby
